

TEMPORARY ROAD CLOSURE PROCEDURES

The following procedures shall be used when setting up a road closure for special events including residential block parties. Any questions should be directed to the Street Operations Dept. at 234-6194.

A 10' lane between intersections must be kept clear to allow for emergency and local traffic access.

A road closed to thru traffic sign shall be placed in the center of the road, at each end of the block that is to be closed for the event.

Traffic cones shall be placed on each side of the road closed sign. Depending on the width of the road, 2-4 cones on each side shall be used. Cones shall be placed so as to allow local residents and emergency vehicles the ability to access the area.
